PROJECTS

Elevate   React, Postgres, CSS3

A job application management platform featuring an SMS/email reminder system for important dates and an incentivized, gamified reward system. Persists user across sessions with cookies and tracks state changes through multiple components. Manages file upload on cloud storage on AWS S3 buckets. Clean design and sleek display for intuitive user experience.

TrainMe   React, CSS3

A web application that connects individuals looking to start a new career with vocational resources offered in the New York City area. Interacts with NYC Open Data API to fetch course data. Winner of best user experience at C4Q Access Code's third annual Hackathon.

Sinistagram   React, Postgres, CSS3

A darker, sinister photo-sharing platform modeled after Instagram. Implements secure authentication using Bcrypt. Employs modern CSS3 styling for optimal user-friendliness.

Madlify   React, CSS3

A Mad Libs inspired phrasal template word game that prompts users for a list of words to be substituted for blanks in a story. Interacts with an API to fetch stories. Rendered, styled and brought to life with React and CSS3.
